The Western Sand Cherry, *prunus beseyi*, is a highly resilient flowering shrub native to Colorado. It is recognized for its ability to thrive under a wide range of extreme conditions, including drought and freezing temperatures. It produces a cherry-shaped fruit which is relished by songbirds.

Similarly, the value Sand Cherry Associates delivers for our clients is rooted in the ability to develop actionable solutions that deliver business results in rapidly evolving and increasingly competitive environments.

Business Entity Policy for Contractors

Sand Cherry requires all contractors to establish themselves as a business entity within the first 30 days of being placed on a project.

- It is our company’s policy to work with established businesses in the form of corporations, partnerships, and Limited Liability Companies (LLC’s)
  - Such entities are responsible for their own trade names, insurance, worker’s compensation, equipment, taxes, etc.
  - Following the end of each tax year, you will be issued a 1099 which will include everything Sand Cherry has paid you during that year, including reimbursed expenses
  - As a business entity, you should be able to deduct most or all of your reimbursed expenses when you file your taxes
  - Consult your legal and tax advisors for more information on the above
- The W9 should be filled out with a Federal Tax ID number which can be acquired through becoming a corporation, partnership, LLC, etc.
- Our clients require background checks; please fill out the release form and send back to Kim Wharton.
